

Prompting Guide

What is DeepSeek R1?

Closed-Source

Open-Source

Models of AI Sizes

R1 671B

R1 70B

R1 32B

R1 14B

R1 7B & 8B

R1 1.5B

Overall Cheat Sheet

1. Best performance in **English/Chinese**; other languages need extra support
2. Use **zero-shot prompting** with clear output expectations, ***not examples***
3. Structure prompts with **markdown/XML** tags for clarity
4. Set temperature **0.5 - 0.7** for balanced creativity vs consistency
5. Keep **context minimal** for *smaller models*
 - *over-explain to lower-tier models*

Nuanced Technique

Solve the following math problem:

`<think> Explain your reasoning step by step. </think>`

`<answer> Provide the final answer here. </answer>`

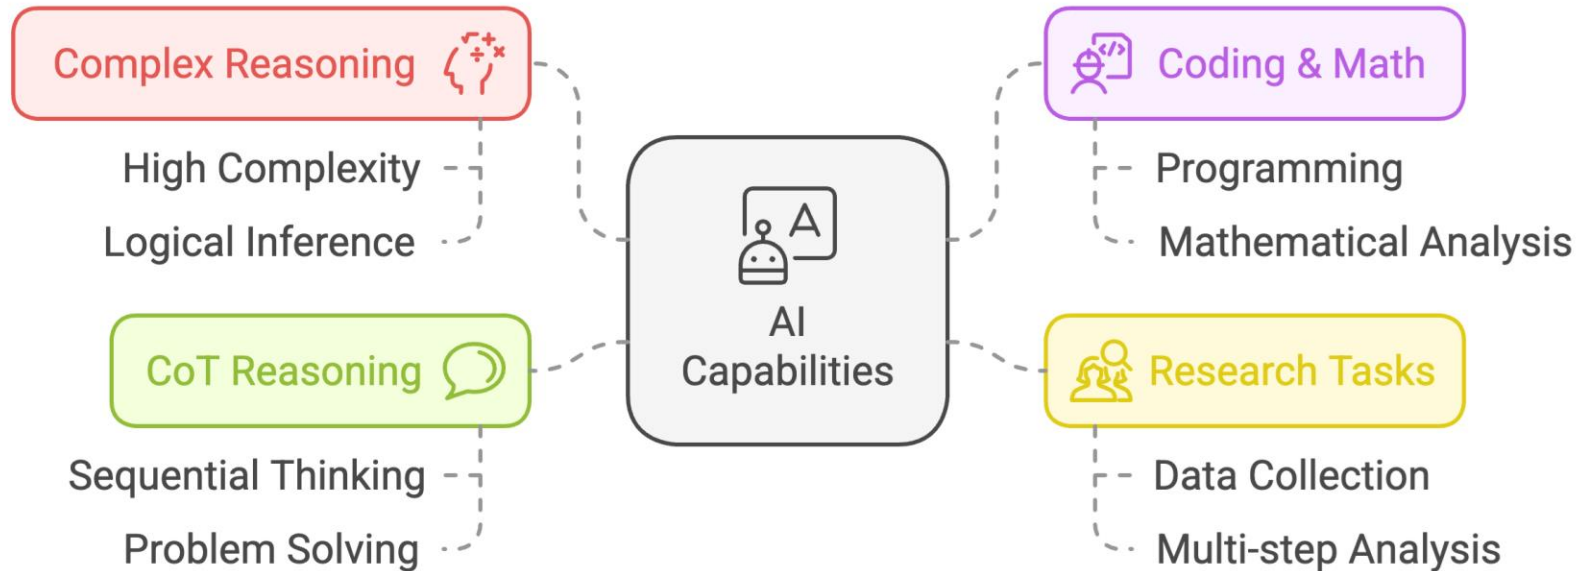

What is the capital of Canada?

`<think> First, identify the country and then verify your answer by cross-checking historical or geographical data. </think>`

`<answer> Ottawa </answer>`

Model-Specific Tips

DeepSeek R1 671B (The FULL Model)
